Subject: RE: Canadian Radium & Uranium Site - Radon Canister Sampling

We will leave the RFPs as 2 properties and request only lab data.

Thanks,

Ben Nwosu

This is one site. Did we have to break Moffat Street into two properties? But if you have to break up properties, there are only two properties....107 and 103. The MTA station is on the 103 property. Just another structure on the property. I am fine with lab data that will be incorporated into our reports.

Subject: Canadian Radium & Uranium Site - Radon Canister Sampling

Eric,

We have received quotes from radon specialists and the number of properties to be sampled appears to be a factor for them to accurately present us a costing for this sampling event.

Based on our conversation yesterday, we identified three properties: 103 Kisco Ave (Hickory Homes and Property, Inc.); 107 Kisco Ave (Stagg Group-Owned) and Milepost 136 (Metro transit Authority). I will have Smita update the RFPs accordingly.

For reporting purposes, please confirm if you are ok with lab data only (which we will use to prepare tables and report the results in our trip report) or do you want the radon specialist's analytical report based on the same lab data they will be providing to us. The second option was costed as \$1,200 for individual reporting for 2 properties. We will now be reporting for three properties based on our recent discussion. Please advise.

Please let me know if you have any questions.

Thanks,

Ben Nwosu
